

## Updating Security Certificate for USFWireless-Auth

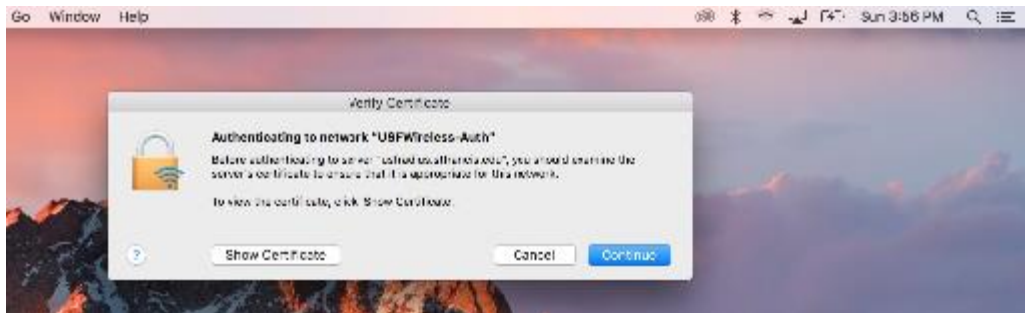

You will notice that your mac will not auto connect to USFWireless-Auth as it did previously.

Please follow the instructions below to update your connection.

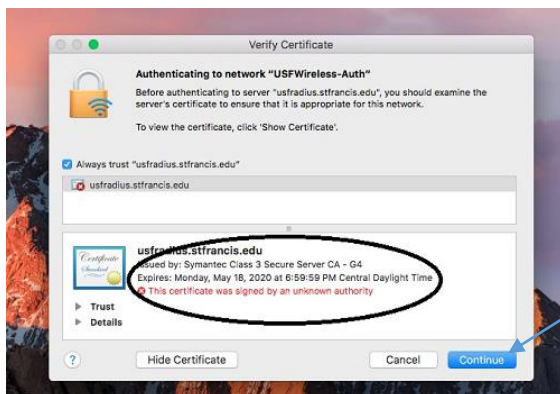

Click your wireless icon in the upper right to show your wireless connections. Select USFWireless-Auth.

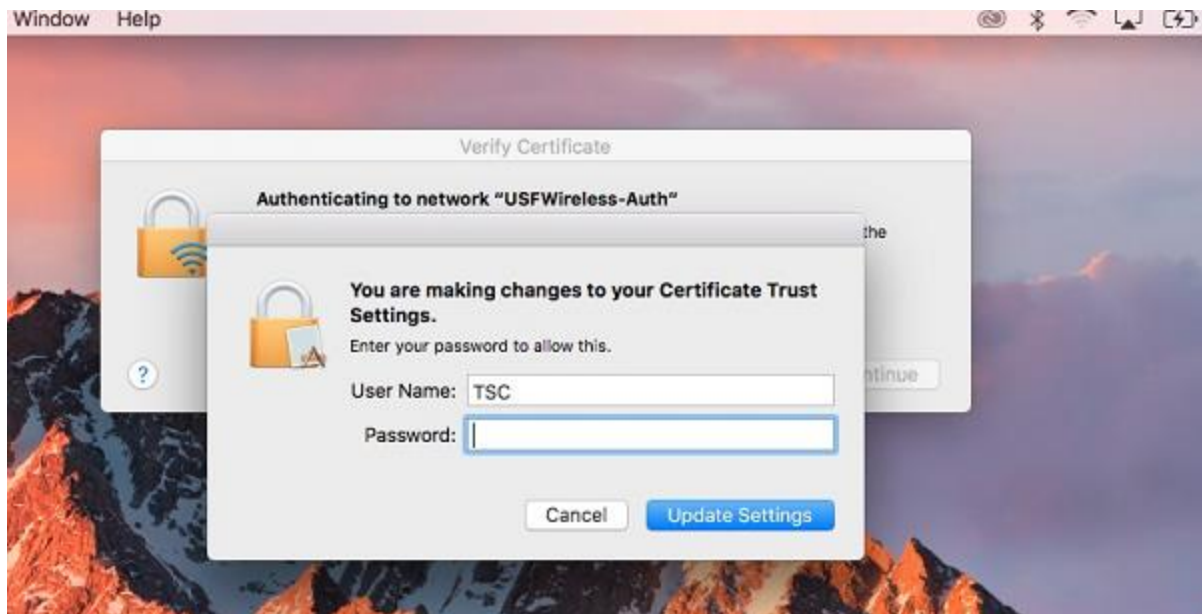

After selecting USFWireless-Auth and you should receive a certificate warning.

Click show certificate. Verify the expiration date shows May 18 2020. After verifying, click continue.

After clicking continue to connect, you may be prompted to enter your local computer password in order to update the certificate store on your machine. This is your local computer username/password, **NOT** your USF account information. After entering your information, click update settings and you will then be connected.

If you are still experiencing problems, please contact the Technology Support Center at 815-768-8324 or visit the office in Marian Hall.
